

Resource Priority/Program Concerns

Natural Resource Priority #4

NRCS Identified
Range Quality (Health)

Natural Resource Concern

NRCS Identified	Additional Concerns
<ul style="list-style-type: none"> ◆ Forage quality and palatability ◆ Productivity ◆ Health and vigor ◆ Undesirable air movement ◆ Plants not adapted to site 	

Causes

NRCS Identified	Additional Causes
<ul style="list-style-type: none"> ◆ Invasion/increases of non-desirable species ◆ Over utilization of rangeland ◆ Decreased production ◆ Land use and land ownership change ◆ Drought ◆ Inadequate water ◆ Inadequate fencing 	

Needs to address concerns

NRCS Identified	Additional Needs
<ul style="list-style-type: none"> Prescribed grazing systems 	
<ul style="list-style-type: none"> Structural improvements (watering facilities, fencing, etc.) 	
<ul style="list-style-type: none"> Brush management 	
<ul style="list-style-type: none"> Increase plant diversity – planting or inter-seeding adapted species 	
<ul style="list-style-type: none"> Monitoring activities 	
<ul style="list-style-type: none"> Livestock nutrition planning – utilizing decision support systems 	
<ul style="list-style-type: none"> Managed prescribed burns 	
<ul style="list-style-type: none"> Increased plant cover and litter accumulation by improving livestock distribution 	
<ul style="list-style-type: none"> Managing access to water bodies/courses 	
<ul style="list-style-type: none"> Off-stream drinking facilities 	
<ul style="list-style-type: none"> Stream crossings 	

Current Barriers

[illegible]
